

Merge zones for more room to cook with the Bridge Function

The 600 Bridge Induction Hob lets you combine two separate cooking zones to create one large surface. With the temperature and time settings automatically aligned, it's ideal for making the most of planchas or roasting pots.

Product Benefits & Features

Merge zones for more room to cook with the Bridge function

The Bridge function lets you combine two separate cooking zones to create a single large surface. With the temperature and time settings automatically aligned, it's ideal for making the most of planchas or roasting pots.

Subtle and smooth. With elegance that lasts

With a smooth, matt black surface, SaphirMatt® SE hobs offer lasting elegance. The design complements any kitchen and continues to look new longer, with up to 3X more scratch resistance than a standard hob surface.*

*Based on abrasion tests conducted by external Swiss laboratory in accordance with international standard IEC 60068-2-70. Scratch visibility is assessed internally in comparison to our standard ceramic glass hobs without special treatment or coating.

Tailored to the size of your pans with Infinite self-sizing zones

The Infinite self-sizing cooking zones adapt to the size of your pans as soon as they are covered. The zones offer total coverage, whatever the size of your pot, delivering heat with no performance loss. Enjoy accurate and efficient cooking with our self-sizing zones.

Hob2Hood® for pure convenience

The Hob2Hood® function wirelessly connects your hob to your hood. Start cooking, and the hood will automatically adjust the settings, providing the best extraction based on the power selected on the hob. It does the hard work for you.

Direct touch control for every zone

Easily adjust your hob's temperature settings with our direct touch controls. Each cooking zone has an individual power control, so it's clear to see and simple to change the heat settings. And as it's one smooth surface, it's easy to clean.

- Left front zone: 2300/3200W/210mm
- Left rear zone: 2300/3200W/210mm
- Right front zone: 1400/2500W/145mm
- Right rear zone: 1800/2800W/180mm
- Middle front zone:
